Stanford University

Dear Technology Entrepreneurship I students,

Just a quick note to welcome you to the class! I'm excited to work with all of you.

The first set of video lectures is here: [https://novoed.com/venture1-2015-1/lecture\\_pages/819038](https://novoed.com/venture1-2015-1/lecture_pages/819038)

You have two initial assignments here: <https://novoed.com/venture1-2015-1/exercises>  
Both **assignments are due on Jan. 11th (note that one is due at 5pm and the other is due at 11:59pm).**

These are individual assignments and it is important that you complete them on time. All assignments after these will be team assignments and after this first week you will start forming teams. I believe entrepreneurship is best learned through team-projects and so that is the emphasis of this course. There are no live/simultaneous lectures, so most of your time will be spent in hands-on projects, which is where both the fun and the learning happens.

Please post any questions in the forum and upvote there. Keep in mind there are only two of us (me and Spike) and nearly 10,000 of you, so please bear with us and answer one another's questions when possible. The community is the key to the learning that happens in this innovative course style.

All the best,

Chuck Eesley

p.s. Spike will send out a short survey soon, so be on the lookout and please respond to that.
