The solve do indicate some trend.

It is better to include some statistical results to prove the claims.

I am not clear if you used  
questionnair for face-to-face  
interview.

Since I can't open the links, I have no  
idea how you did the survey. Since  
online survey and face-to-face  
interview are just two ways to  
investigate the market need, the  
results should be combined to report.
